- ○ **Continuous Integration/ Continuous Deployment (CI/CD):**

- ○ **Containerization:**

08

DevOps Tools

Orchestration Tools:

kubernetes *by Google*

docker

Infrastructure as Code (IaC) Tools

Terraform   CHEF

AWS CloudFormation

SALTSTACK   puppet labs   ANSIBLE

ARM Templates

Monitoring:

DATADOG   elastic

pagerduty   pingdom

graylog   New Relic

ZABBIX   Grafana

Prometheus

Version Control:

GitHub   git

TFS   GitLab

Bitbucket

09 Startup Services

Discuss Product Idea	Validate & Define	Design & Prototype	Development	Quality Assurance & Testing	Product Launch	Scale & Sustain

Ideas are usually innovative but seldom withstand the evolution of the market competition and user expectations. Our Startup IT services aim at helping early stage companies accomplish their goals through product ideation, prototyping, software development, software testing and maintenance. Our familiarity with the marketplace of applications and user expectations makes us the perfect partners for you.

10 Verticals Served _

*Our team has demonstrated remarkable expertise in delivering value proposition to the verticals listed below*

Machine Learning

IoT
